“In the light of extremely difficult market conditions we are satisfied with our performance in the first half of this year. While pre-tax profits may be down by half, around 50% of this shortfall is, of course, due to the reduction in our investment income following repayment of over half the group’s cash holdings in June 2007 with the remainder due to a modest slippage in income and increased investment in analytical and technology staff.

“Revenues from our wider market subscription businesses have increased but a number of our institutional customers have been reducing their market exposure, impacting on our income. However, the quality of our research means that we are fortunate to count many of the biggest and most successful institutional investors amongst our clients.

“We believe we are consolidating our position as a leading investment adviser in markets which often favour a technical analysis approach rather than a fundamentally driven one.”

Chairman's Statement

Financial review

Revenue for the six months ended 30 June 2008 was down 5% to £1,372,000 (2007: £1,439,000) and group operating profit decreased by 47% from £208,000 to £111,000 in 2008.

Profit before tax amounted to £165,000, a decrease of 51% from £339,000 in 2007.

Due to a reversal of the deferred tax asset, basic earnings per share of 1.0p compared to 2.6p in 2007. Normalised basic earnings per share would be 1.4p (2007: 2.6p), a fall of 46%.

Interest income fell 54% reflecting the return to shareholders of over half the group's cash resources in June 2007 as well as a general softening of rates.

We remain cash generative. We had cash balances of £2,590,000 at 30 June 2008 compared with £2,308,000 at the beginning of the year. Net assets per share amounted to 26.4p per share (2007: 25.0p), of which 'free' cash (net of the sum required to repay outstanding redeemable capital) represented 25.1p per share (2007: 25.2p).

Review of operations

Our **institutional investor consultancy** showed a net 11% drop in income during the first six months of the year, due in the main to the loss of one significant client in mid-2007. Although we experienced a net loss of two customers between the two periods, the movement generated a modest increase in income, countered by a general reduction in an increase from the remaining customer base.

Demand for **Fullermoney**, our global investment strategy service, has continued to increase. Numbers of subscribers at 30 June 2008 were 15% more than a year earlier with subscription income up by 22%.

Income from our US business, **Chartcraft Inc**, showed a 19% increase in both £ and US\$ terms whereas our non-US activities conducted through **Investors Intelligence** showed flat revenues between 2007 and 2008.

“We are pleased to report that our reputation for providing clarity and valuable timing advice to our customers during the recent turmoil in global markets has increased considerably in the last six months.”

Ecube, our website developer, is continuing to generate more stable hosting and maintenance income but the level of development income we enjoyed in the first half of 2007 has not been repeated with a number of expected third party projects being deferred from the first half of 2008.

Trading outlook

We are unable to foresee when global market conditions will return to ‘normal’ — whatever that may mean for the medium term. We are dependent on our institutional customers’ appetite and opportunity to trade and on our subscribers’ continuing interest in stock and other markets.

Certainly we expect consolidation, or rather increasing polarisation, in the fund management sector where smaller funds that lack critical mass will close and the larger funds will grow. We are sufficiently flexible to service equally well managers of stand-alone funds or within groups of larger funds.

Our ‘steady as she goes’ approach and our concentration on providing our customers with the help they need and the clearest analysis possible should keep us out of trouble.

Notes to the Interim Report

for the six months ended 30 June 2008

1. Statement of Compliance

The consolidated financial information has been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as adopted by the European Union applied in accordance with the provisions of the Companies Act 1985 and in accordance with IAS 34, Interim Financial Reporting.

The results for the year ended 31 December 2007 have been audited whilst the results for the six months ended 30 June 2007 and 30 June 2008 are unaudited. The financial information contained in this interim report does not constitute statutory accounts as defined in section 240 of the Companies Act 1985. The statutory accounts for the previous year, which were prepared under IFRS, have been delivered to the Registrar of Companies. The auditors’ opinion on those accounts was unqualified and did not contain a statement made under s237 (2) or s237 (3) of the Companies Act 1985.

2. Accounting Policies

Basis of preparation of interim financial statements

The interim financial information has been prepared using accounting policies consistent with IFRS, as set out in the last annual report to 31 December 2007.

They have all been applied consistently throughout the period covered by these financial statements.

Principal risks and uncertainties for the remaining six months of the financial year

The group does not have any gearing which would impact the results over the remaining six months of the year.

Further, the group has surplus cash available and should be in a strong position to take advantage of situations arising out of the current economic environment.

3. Revenue

Revenue, which is stated net of value added tax, represents the sales value of work done in the year.

Revenue is attributable mainly to the continuing activity of the provision of research and analysis of price trends in stocks, commodities, currencies and interest rates.

An analysis of the group's revenue is as follows:

	Unaudited Six months to 30 June 2008 £'000	Unaudited Six months to 30 June 2007 £'000	Audited Year to 31 December 2007 £'000

4. Business and geographical segments

Segmental information is presented in the consolidated financial statements in respect of the group's geographical segments, which are the primary basis of segment reporting. The group's operations are in two geographical segments, the United Kingdom and United States. The group's operations are predominantly in one business segment.

Diluted	1.0p	2.6p	4.8p

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. A calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average annual market share price of the company's shares) based on the monetary value of the subscription rights attached to outstanding share options. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options. Based on these calculations there were no dilutive potential ordinary shares in 2008 (2007: nil).

8. Capital reorganisation

On 20 June 2007, the company was granted court approval to repay part of its capital by way of capitalisation of part of the share premium account. For each one Ordinary share, five 'B' shares of 5p each were credited as fully paid at par. Each 'B' share was then cancelled and repaid to shareholders on 27 June 2007, unless subject to an election to defer cancellation until 2008. The nominal value of 'B' shares subject to this election is £170,071. This is shown as a financial liability in the Balance sheet as at 30 June 2008 was repaid on 3 July 2008.

The model used in the calculation of share-based payments was the Binomial model and the charge for the period was not material.

12. Publication of non-statutory accounts

The financial information for the six months ended 30 June 2008 has not been reviewed in accordance with the guidance in ISRE 2140 “Review of interim financial information.”

Statement of Directors' Responsibilities

The directors confirm that this condensed consolidated interim financial information has been prepared in accordance with IAS 34 as adopted by the European Union and that the interim management report includes a fair view of the information required, namely:

- An indication of important events that have occurred during the first six months and their impact on the condensed set of financial statements, and a description of the principal risks and uncertainties for the remaining six months of the financial year; and
- Material related party transactions in the first six months and any material changes in the related party transactions described in the last annual report.
